Case Study: HBAT Industries¹

Background

HBAT industries (HBAT), is a premium manufacturer of paper products in U.S. Its paper products are used widely in the newsprint industry and the magazine industry both inside and outside of North America. It is a well established company with a fully developed Marketing unit. The company either uses it distribution channels or brokers channel to supply the paper products to the customer. But due to the changing customer perceptions and relationships, the company is facing challenges by newer companies. HBAT management is concerned and wants to change their marketing strategy for the next year to regain its market share. HBAT wants to identify and position itself accordingly to the characteristics of its customers and the relationships between their perceptions of HBAT, and their actions towards HBAT (e.g., satisfaction and likelihood to recommend).

To help HBAT marketing unit, the management has hired Crimson Consulting Co. (Crimson). Crimson Consulting Co., is an established marketing research company. It has one of the well established lead-user groups. Crimson collected part of the data set through online surveys of HBAT customers completed on a secure website. Crimson contacts purchasing managers and encourages them to participate. To do so, managers log to the web and finish the survey. The survey data are supplemented by other information compiled and stored in HBAT's data warehouse and accessible through its decision support system.

Database

The database, consisting of 100 observations on 18 separate variables, is based on a market segmentation study of HBAT customers. As you already know, HBAT sells paper products to two market segments: the newsprint industry and the magazine industry. The paper products are sold to these market segments either directly to the customer, or indirectly through broker.

Two types of information were collected in the surveys. The first type of information was perceptions of HBAT's performance on 13 attributes. These attributes, developed through focus groups, a pretest, and variables used in previous studies, are considered to be the most influential in the selection of suppliers in the paper industry. Respondents included purchasing managers of firms buying from HBAT, and they rated HBAT on each of the 13 attributes using a 0-10 scale, with 10 being "Excellent" and 0 being "Poor". The second type of information relates to purchase outcomes and business relationships (e.g., satisfaction with HBAT and whether the firm would consider a strategic alliance / partnership with HBAT).

A third type of information is available from HBAT's data warehouse and includes information such as size of customer and length of purchase relationship.

Data information and description

¹ Adapted from J. F. Hair Jr. et al., Multivariate Data Analysis, 6th ed., Pearson, New Jersey (2006).

Brief descriptions of the database variables are provided in Table 1-1, in which the variables are classified as either independent or dependent, and either metric or non-metric. A definition of each variable and an explanation of its coding are provided in the following sections.

TABLE 1-1 Description of Database variables Variable Description		Variable Type
	Warehouse Classification Variables	
X1	Customer Type	Non-metric
X2	Industry Type	Non-metric
X3	Firm Size	Non-metric
X4	Region	Non-metric
X5	Distribution System	Non-metric
Perfor	mance Perceptions Variables	
X6	Product Quality	metric
X7	E-Commerce Activities/Website	metric
X8	Technical Support	metric
X9	Complaint Resolution	metric
X10	Advertising	metric
X11	Product Line	metric
X12	Sales Force Image	metric
X13	Competitive Pricing	metric
X14	Warranty and Claims	metric
X15	New Products	metric
X16	Ordering and Billing	metric
X17	Price Flexibility	metric
X18	Delivery Speed	metric
Outco	me/ Relationship Measures	
X19	Satisfaction	metric
X20	Likelihood of Recommendation	metric
X21	Likelihood of Future Purchase	metric
X22	Current Purchase/ Usage Level	metric
X23	Consider Strategic Alliance/ Partnership in Future	Non-metric

Data Classification

Data Warehouse Classification Variables

As respondents were selected for the sample to be used by the marketing research firm, five variables were extracted from HBAT's data warehouse to reflect the basic firm characteristics and their business relationship with HBAT. The five variables are as follows:

X1	Customer	Length of time a particular customer has been buying from HBAT:	
	Type	1= Less than one year	
		2= Between 1 and 5 years	
		3= Longer than 5 years	
X2	Industry		
	Type		
		1= Newsprint industry	
X 7.0	T: G:		
X3 Firm Size Employee size: 0= Small firm, few		* *	
		0= Small firm, fewer than 500 employees	
		1= Large firm, 500 or more employees	
X4	Region	Customer Location:	
		0= USA / North America	
		1= Outside North America	
V5	Distribution	Here many mandy states are sold to system and	
X5	Distribution		
	System	0= Sold indirectly through a broker	
		1= Sold directly	

Performance Perceptions Variables

Each respondent's perceptions of HBAT on a set of business functions were measures on a graphic rating scale, where a 10-centimeter line was drawn between the endpoints, labeled "Poor" and "excellent", shown here.

As part of the survey, respondents indicated their perceptions by making a mark anywhere on the line. The location of the mark was electronically observed and the distance from 0 (in centimeters) was recorded in the database for that particular survey. The results were a scale ranging from 0 to 10, rounded to a single decimal place. The 13 HBAT attributes rated by each respondent were as follows:

X6	Product Quality	Perceived level of quality of HBAT's paper products
X7	E-Commerce Activities /	Overall image of HBAT's Web site, especially user-
	Web Site	friendliness
X8	Technical Support	Extent to which technical support is offered to help
		solve product/service issues
X9	Complaint Resolution	Extent to which any complaints are resolved in a
		timely and complete manner
X10	Advertising	Perceptions of HBAT's advertising campaigns in all
		types of media
X11	Product Line	Depth and breath of HBAT's product line to meet

		customer needs
X12	Sales Force Image	Overall image of HBAT's sales force
X13	Competitive Pricing	Extent to which HBAT offers competitive prices
X14	Warranty and Claims	Extent to which HBAT stands behind its product/
		service warranties and claims
X15	New Products	Extent to which HBAT develops and sells new
		products
X16	Ordering and Billing	Perceptions that ordering and billing is handled
		efficiently and correctly
X17	Price Flexibility	Perceived willingness of HBAT sales reps to
		negotiate price on purchases of paper products
X18	Delivery Speed	Amount of time it takes to deliver the paper products
		once an order has been confirmed

Outcome/ Relationship Measures

Five specific measures were obtained that reflects the outcomes of the respondent's purchase relationships with HBAT. These measures include the following:

X19	Customer Satisfaction	Customer satisfaction with past purchases from HABT,
		measured on a 10-point graphic rating scale
X20	Likelihood of	Likelihood of recommending HBAT to other firms as a
	Recommending HBAT	supplier of paper products, measured on a 10-point
		graphic rating scale
X21	Likelihood of Future	Likelihood of purchasing paper products from HBAT in
	Purchases from HBAT	the future, measured on a 10-point graphic rating scale
X22	Percentage of	Percentage of the responding firm's paper needs
	Purchases from HBAT	purchased from HBAT, measured on a 100-point
		percentage scale
X23	Perception of Future	Extent to which the customer/ respondent perceives his
	Relationship with	or her firm would engage in strategic alliance /
	HBAT	partnership with HBAT:
		0= Would not consider
		1= Yes, would consider strategic alliance or partnership

The data set is given in excel file: "HBAT Case Data.xls" and SPSS data file "HBAT.sav".
